MADRIX 5.5 – Massive New Software Update Now Available

The MADRIX Team is incredibly excited and happy to announce one of its biggest releases ever. MADRIX 5.5 is a huge update to the MADRIX 5 Software for LED lighting control. Exciting new features and improved workflows will bring your pixel mapping to the next level. The main highlights include:

MIDI Button Feedback — One of the most requested features of the MADRIX community has finally arrived. Visual feedback on MIDI controllers is now available and makes you much more efficient at operating your lighting rig.

Timelines — Timelines add a completely new way to work with MADRIX 5. Create stunning light shows that sync to music. Based on time code, you can use sequencing to trigger cue segments at exactly the right time and synchronize your lighting to audio, which is shown in waveforms. MADRIX 5 itself can become the time-code sender.

Performance — MADRIX 5.5 improves the performance across the board. Especially, patches that leave a lot of space between fixture profiles will see the biggest improvements.

License System — The maximum available DVI output has been increased for the following licenses:
– MADRIX 5 start: From 4,096 (64 x 64) to 16,384 (128 x 128)
– MADRIX 5 entry: From 16,384 (128 x 128) to 264,144 (512 x 512)
– MADRIX 5 basic: From 264,144 (512 x 512) to 1,048,576 (1024 x 1024)
– MADRIX 5 professional: From 1,048,576 (1024 x 1024) to 2,097,152 (2048 x 1024)

Fixture Replacement — In the Patch Editor, you can now quickly replace already patched fixture profiles.

SCE Video: HSB — Adjusting your videos and tuning their colors is now possible with controls for hue, saturation, brightness, as well as contrast.

Workflows — Whether it is the increased number of 256 Fixture Groups that can be controlled remotely, brand-new Effect Options to define the exact start frame of supporting effects, support for multiple Cue Lists, or one of the many other features, MADRIX 5.5 includes a wide range of enhancements for new or improved workflows.

MADRIX 5.5 is a free update for MADRIX 5 users and available for download on www.madrix.com
The MADRIX Team is looking forward to seeing your incredible projects!

About MADRIX®

Benefit from years of experience and industry knowledge. inoage® develops lighting software since 2005. Our dedicated team created the award-winning controller MADRIX® 5. We are located in the beautiful city of Dresden. MADRIX® is all about powerful yet simple products for creative LED lighting. This includes compelling tools for lighting management, monitoring, and control. We are proud to put our newest innovation into your hands. MADRIX® products are proudly designed, engineered, and made in Germany. We are creating high-quality products for you that are easy to use and reliable. Innovative features will bring you the best results. And opting for such highly manageable products means that you can drastically reduce on-site support; and thus your time and costs.
